MASTERVERGE®

C03P SLATE DRY VERGE

TECHNICAL DATA SHEET

The Kytun Retro-Fit Slate Dry Verge System trim is ideal for roofs to which slates have already been fixed, to prevent slates from wind uplift.

The design helps protect the edge of the roof from the elements and eliminates the possibility of lifting and damage to the roof underlay. No mortar or timber guides are required. It can be bespoke manufactured to virtually any profile to suit individual requirements.

C03P SLATE DRY VERGE uPVC

TECHNICAL DATA SHEET

Product Details

The Kytun Retro-Fit Slate Dry Verge System trim is ideal for roofs to which slates have already been fixed, to prevent slates from wind uplift.

It is installed by placing the trim over the edge of the slates and face fixing into the barge boards.

The components are manufactured from high durability extruded and injection moulded UV inhibited PVC-U.

Product Features

- Provides full wind uplift and rain protection.
- Patented 'Drip System' which allows for self drainage of rain water into the gutter.
- Extremely easy and quick to install.
- Requires no maintenance once installed.
- Extensive range of colours available.
