APEXRIDGE®

DRY RIDGE KIT BRACKET

MAIN ADVANTAGES OF USING OUR PRODUCT AGAINST OUR CLOSEST COMPETITORS.

PRODUCT BENEFITS

✓ Material & Physical Properties

LDPE - Product is rubberised making it more flexible, less brittle and has higher flexural strength.

✓ Ventilation

Water channels on the bracket allow Ventilation at the roof ridge.

✓ Angle Capacity

Flexible nature of the bracket gives a tight fix to ridge tile including, steep plain angle ridges.

✓ Water run off – Drainage

Drainage channels to ensure water does not enter roof space. Water directed onto roof covering.

✓ Fixing

Due to its innovative design the bracket fits tight to the ridge capping (Half round or angled) when screw is fixed.

✓ T section

The new "hinged" T section allows the ridge bracket to work with some of the thickest Ridge tiles on the market.

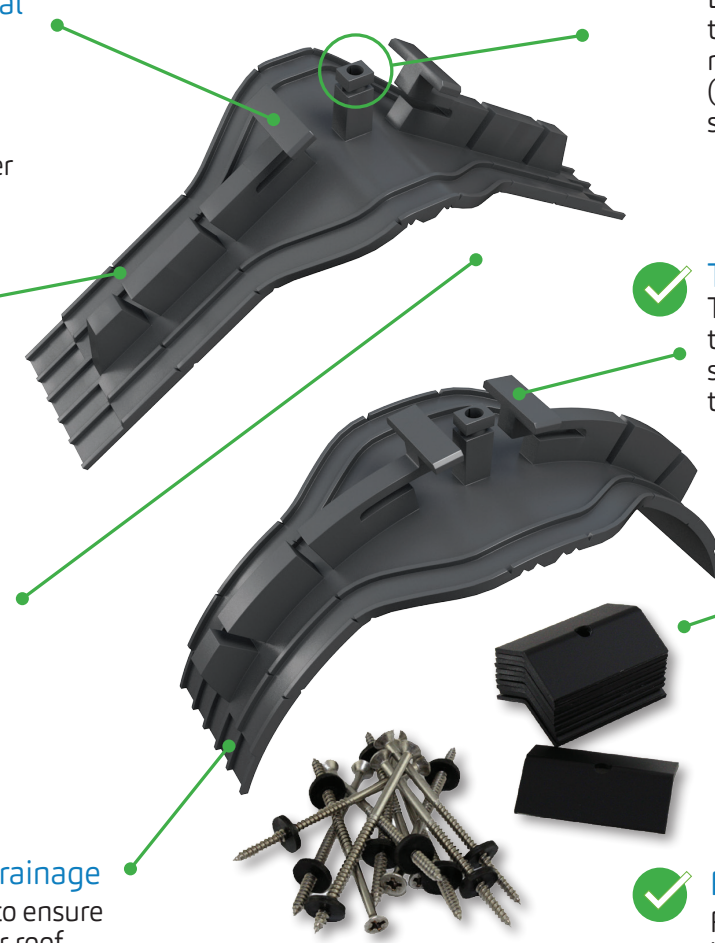

✓ Capping Piece

Aluminium capping piece 2mm thick.

**100%
Guaranteed
Not to crack or break.**

✓ Pre-installation

Ridge Bracket can be pre-installed to Ridge Tiles due to its innovative design to allow for faster installation of your ridge.
