

CLASSIC RIDGE ROLL

RRCL01

TECHNICAL DATA SHEET

Product Details

RRCL01

Classic roll is the sealing-ventilation tape to be used on sloping and level roof ridges.

The PP geotextile is used, which has special UV stabilising additives, due to which the product durability is guaranteed for minimum 10 years after the roof covering.

The central flat “spine” of the roll is reinforced for fixing to the ridge batten. The two corrugated side flaps are designed to drape down over the top row of tiles on either side as the roll is opened out. The underside has a strip of self-adhesive butyl protected by an easy-release backing tape.

Features & Benefits

Code:	RRCL01
Width:	310mm
Aluminium thickness:	140 µ
UV stabilisation:	Yes
Material:	Polypropylene (PP)
Air permeability:	280 g/m ²
Width butyl glue:	15 mm + / - 1 mm
Thickness butyl glue:	1.5 mm + / - 1 mm
Min. installation temp.:	+ 5 °C
Temp. resistance:	- 30 °C to + 80 °C
