

Product Details

KYTILRDBL

The 'In-Line' ventilators have been designed to be both unobtrusive and practical. The 10k ventilation area is recessed within the profile, and has no sharp edges to trap leaves and any other debris significantly reducing the risk of blocked ventilation and is suitable for pitches of 22.5° and above.

Product Features

- Moulded in 'High Impact Polystyrene'.
- UV Acrylic paint to match most tile profiles and finishes.
- Suitable for use with pitches of 22.5° and above.
- Recommended 4mm flyscreen protection.
- Comply fully with the requirements of NHBC, BS 5250 and BR Document C.
- Ventilation area 10,000mm².

Technical

Performance: Guaranteed actual nett free ventilation area: 10,000mm²

Spacing: 2.0m for 5,000mm²/m
 1.0m for 10,000mm²/m

Terminal Performance

Airflow resistance
 Resistance when used as
 an extract terminal.

10Pa	54m ³ /hr (15 litres/sec)
42Pa	108m ³ /hr (30 Litres/sec)
162Pa	216m ³ /hr (60 Litres/sec)

STR110: Square to round pipe adapter to suit 110mm flexi-pipe
