

Description

SV Soffit Ventilators are for installation at eaves with a projecting soffit, and must always be used with RV Rafter Ventilators to provide a continuous ventilation path from the roof void to the outside without impairing the weatherproof function of the structure, as required by BS 5250.

SV200 Soffit Ventilators are designed for easy installation in existing soffits, but can also be used in new work.

Advantages

- Can be used with all common soffit board materials.
- Lightweight and durable.
- Quick and easy to install; no special tools required.
- Prevent large insect ingress.
- Independent of rafter spacing.
- Suitable for new roofs and refurbishment.
- Colours to match stained or painted soffit boards.

Technical

Actual Ventilation:	10,000mm ² /m at 200mm centres
Size:	70mm Diameter
Colour:	White • Black • Brown

Authority

Can be used to comply with roof space ventilation requirements of Building Regulations Approved Document C2 and BS 5250.

Composition, Manufacture All soffit strips are extruded PVC-U in 2.44m lengths.

SV200 Joint Connectors are injection-moulded polypropylene.
